REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Applicants amendment has overcome the Patterson reference, as it has now been explicitly claimed that the operands can specify different registers, while Patterson only teaches the claim when the operands specify the same register. Examiner has performed a new search, and has been unable to find any art which teaches the claimed invention, namely, the limitation which states that the flag indicates if only the operand held in the first register should be operated on, or operands held in the first and second register should both be operated upon, regardless of if the operands specify the same register, in combination with the other limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
